

Information Security Controls

Dale Meredith

@dalemeredith | www.daledumbsitdown.com

“

I don't even call it violence when it's self-defense, I call it intelligence.

— Malcolm X

”

Information Security Controls

- ❑ Necessity of Ethical Hacking
- ❑ What Skills You Must Have
- ❑ Multi-layered Defense
- ❑ Incident Management
- ❑ Security Policies

Information Security Controls

- ❑ Vulnerability Research
- ❑ Data Leakage
- ❑ The Role of AI/ML
- ❑ Penetration Testing

Necessity of Ethical Hacking

Rapid Growth in Tech = Trouble

What Ethical Hackers do for companies

- ❑ Review systems and infrastructure
- ❑ Test current security
- ❑ Create solution
- ❑ Retest

You HAVE to answer questions like:

- ❑ What can be seen?
- ❑ What is being monitored?
- ❑ What can be done?
- ❑ Is there adequate protection?
- ❑ Are compliances met?

What Skills You Must Have

“I’ve Got Hacking Skills”

O/S Knowledge

Computer
professional

Network guru

Security awareness

“I’ve Got Hacking Skills”

Software
knowledge

Management skills

Patience

A lot of “Sherlock
Holmes”

Multi-layered Defense

“You’ve Leveled Up”

Incident Management

Think Outside the Box

Identify

Analyze

Prioritize

Resolve

The “Why” of Incident Management

Better service
quality

Pro-active

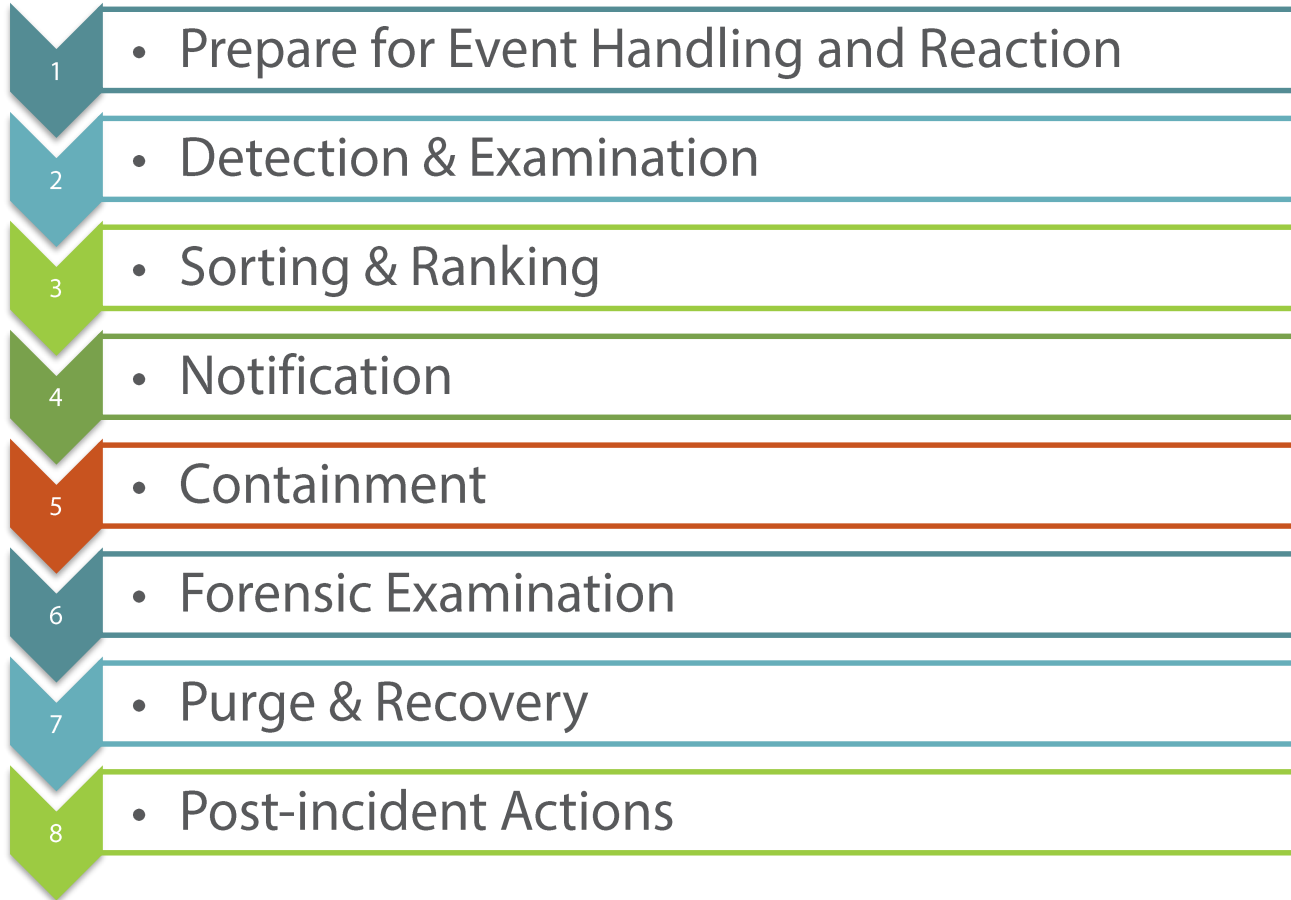

Reduces impact

Meets availability

More efficient &
productive

Customer/user
satisfaction

IM Process

Data Leakage

What The...?

- ❑ Major risks to your organization!
- ❑ Insider and external threats

It's A Bird, It's A Plane, It's DLP!

- ❑ Looks at the data
- ❑ Looks at the rules
- ❑ Determines what can be done

“Back It Up, Back It Up, My Daddy Taught Me Good”

- ❑ ID the data
- ❑ Select the technology
- ❑ Choosing a RAID

“Back It Up, Back It Up, My Daddy Taught Me Good”

Choose a method

- ☐ Hot
- ☐ Cold
- ☐ Warm

Location:

- ☐ Onsite
- ☐ Offsite
- ☐ Cloud

- ☐ Choose the type
- ☐ Full
- ☐ Incremental
- ☐ Differential

<input checked="" type="checkbox"/>	<hr/>
<input checked="" type="checkbox"/>	<hr/>
<input checked="" type="checkbox"/>	<hr/>

Don't EVER assume it works!
Validate your process.

-SuperDale

The Role of AI/ML

I'm Sorry Dale, I'm Afraid I Can't Do That"

- ❑ Not just for cars
- ❑ Beware
- ❑ Machine Learning
- ❑ We're #4!

Security Policies

Security Policies

- 1 • Create an outline
- 2 • Protect resources
- 3 • Legal liability
- 4 • Computing resources
- 5 • Unapproved modification of data
- 6 • Loss of private & sensitive data
- 7 • Separate user's access rights
- 8 • Shield from thief, misuse, illegal disclosure

Taxonomy of Security Policies

Security Policies Examples

Acceptable-use

Passwords

User account

Email security

Remote-access

Firewall

**Information
protection**

**Network
connection**

Special access

Vulnerability Research

Knowledge IS Power!

- ❑ How often are you checking?
- ❑ Where do you check?
- ❑ Start thinking like a Hacker
- ❑ Collect information about trends in security, attacks, and threats
- ❑ Find out how to recover

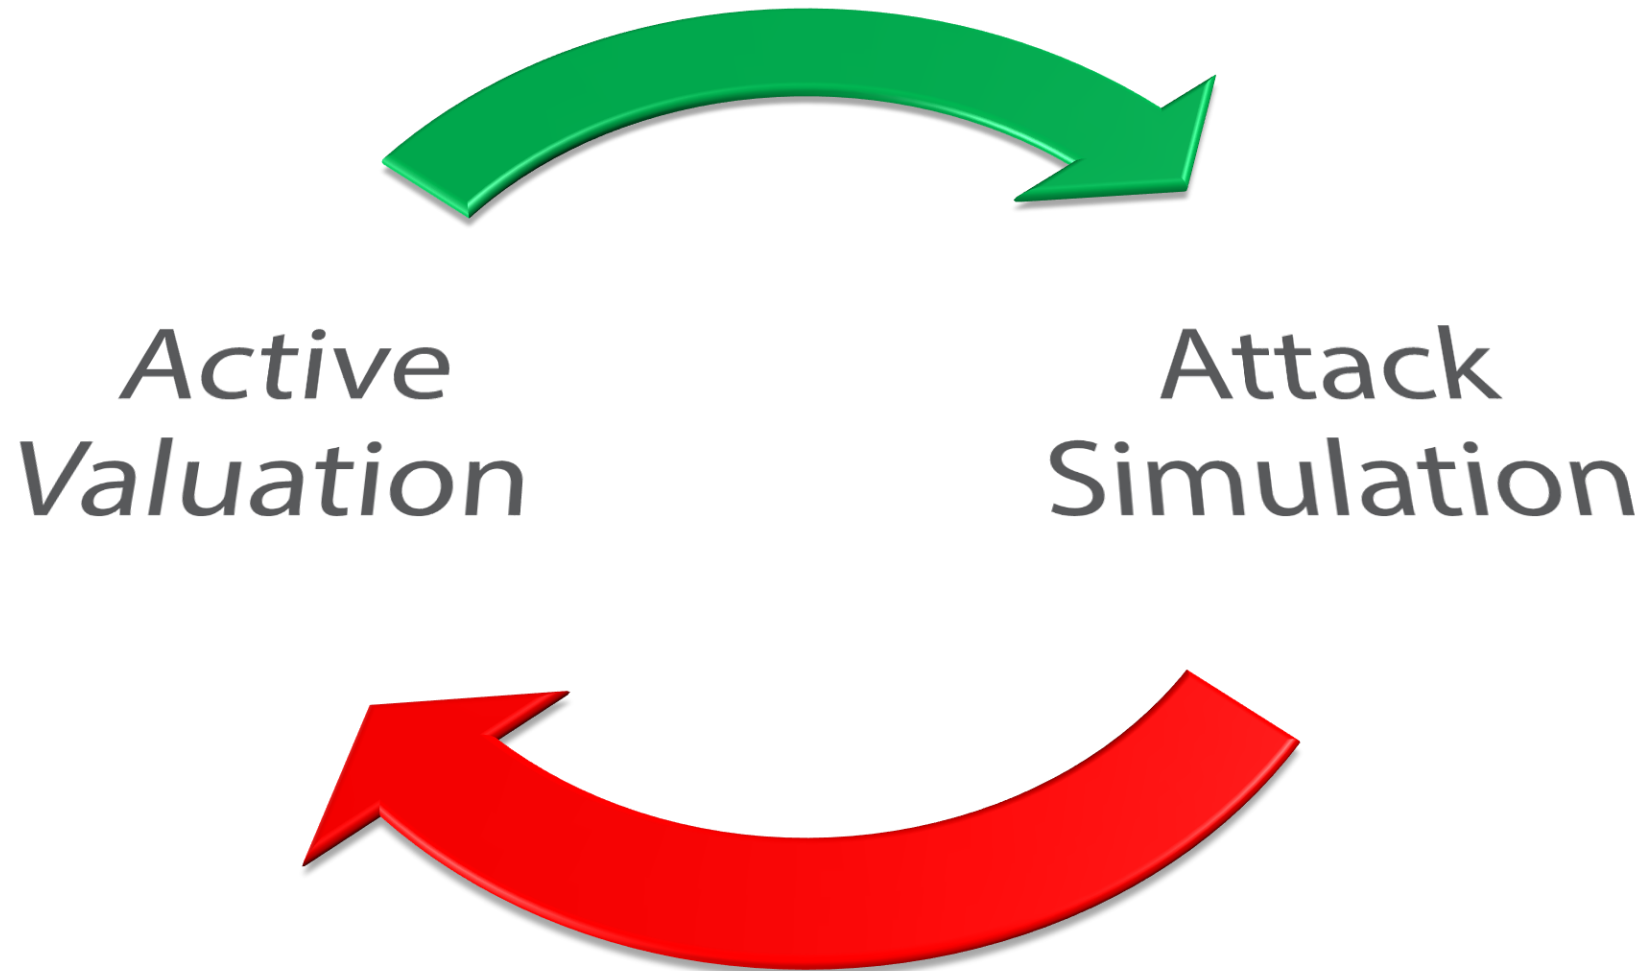

Places to Look

- ❑ O/S Vendors
- ❑ Application vendors
- ❑ Hardware vendors
- ❑ Manufacture vendors
- ❑ Component vendors
- ❑ Security related sites/blogs
- ❑ www.hackerstorm.co.uk
- ❑ www.eccouncil.org
- ❑ www.securitymagazine.com
- ❑ www.securityfocus.com
- ❑ blogs.windowssecurity.com
- ❑ www.hackersjournals.com
- ❑ www.zdnet.com/topic/security

Penetration Testing

Pen-testing - "Not a Job at Bic"

Why?

ID threats

Reduce ROSI

Gauge efficiency

Upgrades

Test controls

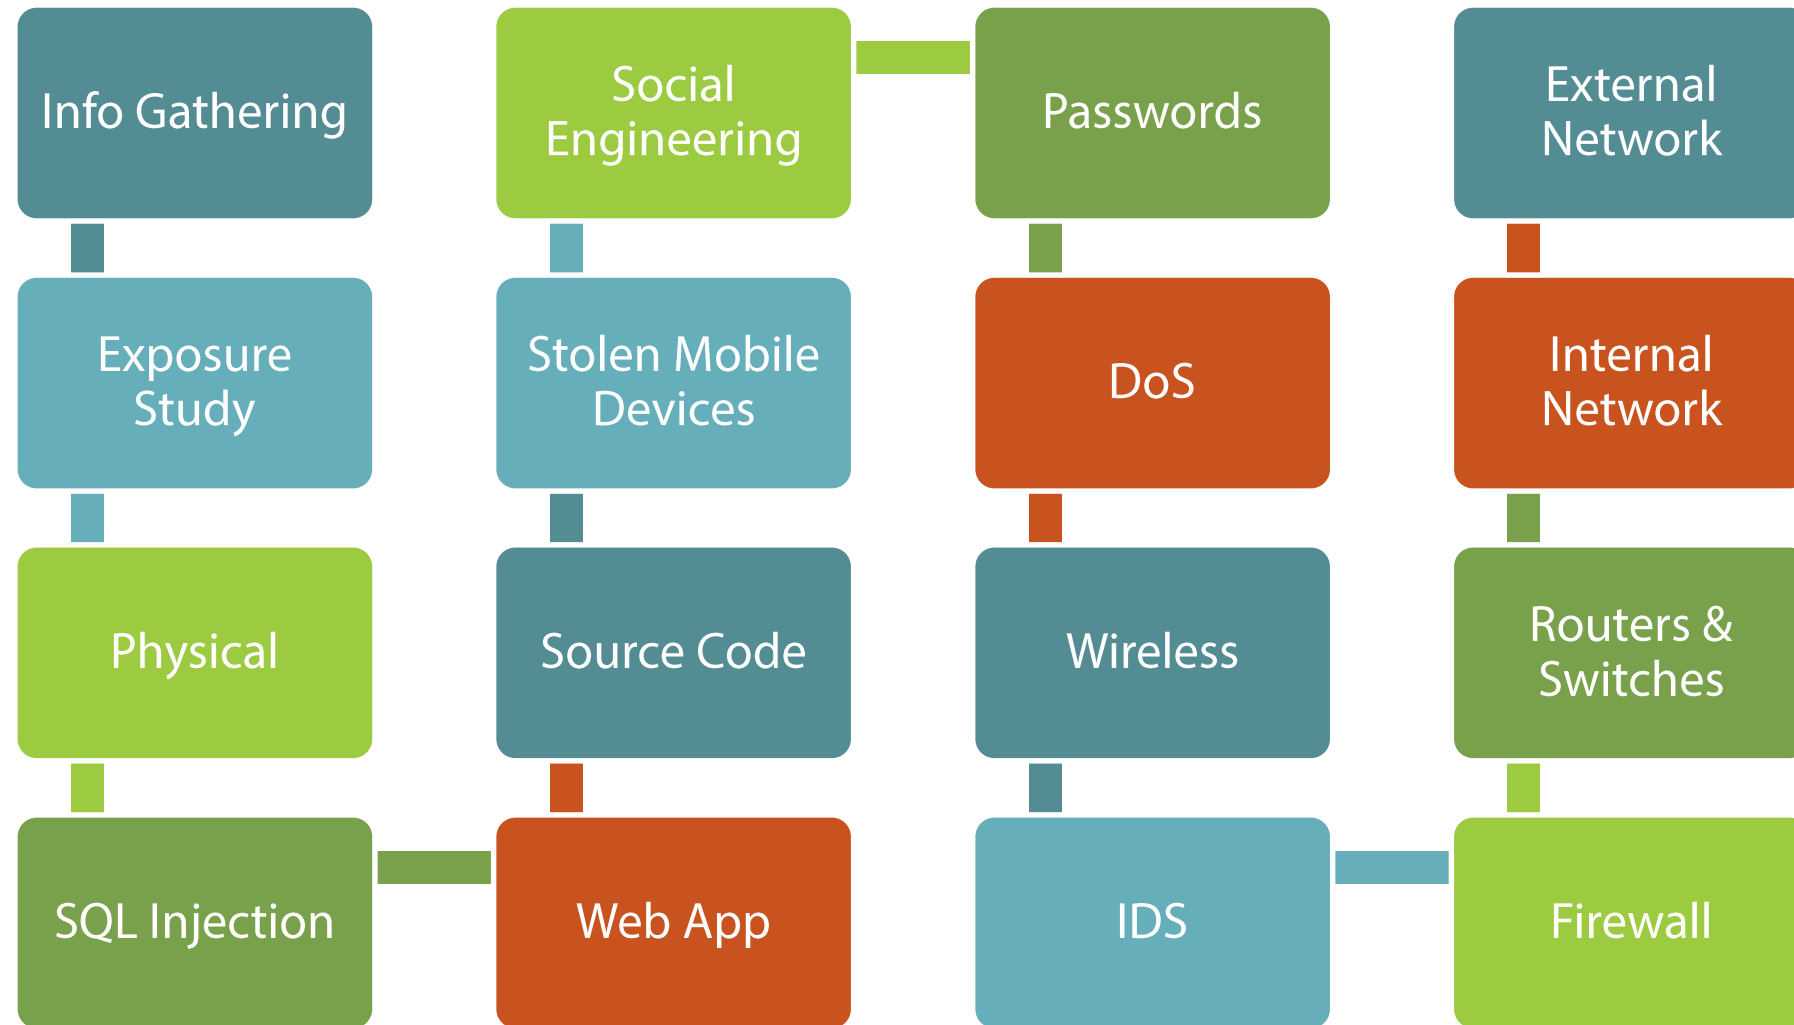

Maintain standards

Reassurance

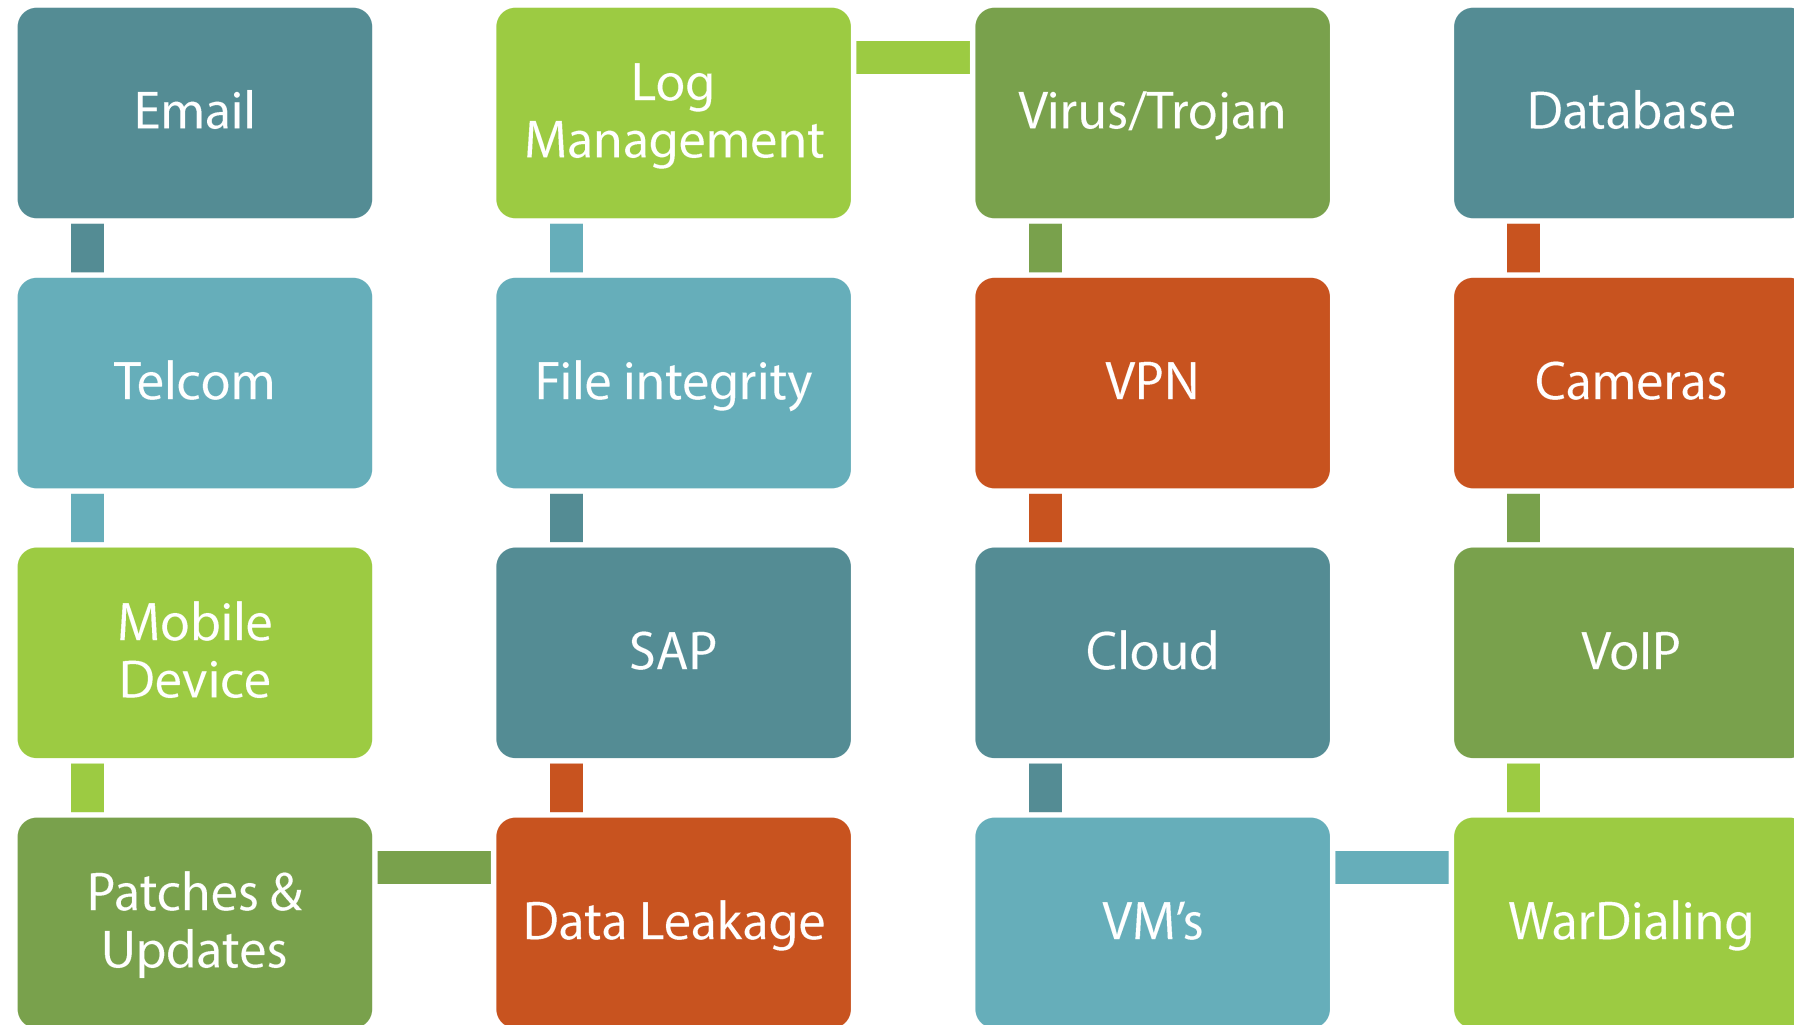

Best practices

In-house development

Method

Method

Summary

- ❑ Necessity of Ethical Hacking
- ❑ What Skills You Must Have
- ❑ Multi-layered Defense
- ❑ Incident Management
- ❑ Security Policies

Summary

- ❑ Vulnerability Research
- ❑ Data Leakage
- ❑ The Role of AI/ML
- ❑ Penetration Testing
